

PRIMARY MANAGEMENT AND CARE (PROTOCOL-BASED)

(MoHFW Guidelines – SBA / IMNCI /NCD)

FORM 1: IMNCI CASE (Child with Cough)

A–D BASIC DETAILS (Summary)

- Student: Riya Patel | Area: PHC | Date: 25/03/2026
- Client: R.K. | Age: 2 years | Gender: Male
- Protocol: IMNCI
- Complaint: Child presented with cough and fever for 3 days

Q E. SCREENING / ASSESSMENT

S. No.	Screening Component	Findings	Remarks
1	General danger signs assessed	No danger signs present	Stable
2	Respiratory rate counted	48 breaths/min	Fast breathing
3	Chest indrawing checked	Absent	Mild condition
4	Temperature measured	38°C	Fever present
5	Feeding status assessed	Feeding adequately	Good

F. CLASSIFICATION

- Child **was classified as:** *Pneumonia (Fast Breathing)*

G. PRIMARY MANAGEMENT AND CARE

S. No.	Components of Care	Care Delivered by Student	Remarks
1	Assess and classify illness	Assessed and classified as pneumonia	Correct
2	Give first dose of antibiotic	Administered first dose (as per protocol)	Done
3	Manage fever	Advised paracetamol and tepid sponging	Done
4	Ensure feeding and fluids	Encouraged continued feeding	Done
5	Monitor condition	Observed child condition	Stable

H. HEALTH ADVICE

S. No.	Advice Component	Advice Given	Remarks
1	Continue feeding	Mother advised to continue breastfeeding	Accepted
2	Recognize danger signs	Explained signs like fast breathing, lethargy	Understood
3	Maintain hygiene	Advised handwashing	Reinforced

I. REFERRAL DECISION

S. No.	Referral Criteria	Decision	Reason
1	Severe pneumonia signs	Not Required	No danger signs

J–K LEARNING & CONCLUSION

- Learned IMNCI classification and management
- Concluded that early identification prevents complications

FORM 2: SBA CASE (ANTENATAL CARE)

A–D BASIC DETAILS

- Student: Neha Shah | Area: Sub-centre | Date: 24/03/2026
- Client: P.M. | Age: 24 yrs | Gravida 2
- Protocol: SBA (ANC)
- Complaint: Routine antenatal check-up

Q E. SCREENING / ASSESSMENT

S. No.	Screening Component	Findings	Remarks
1	Blood pressure measured	110/70 mmHg	Normal
2	Weight checked	55 kg	Normal
3	Hemoglobin checked	10.5 gm/dl	Mild anemia
4	Fundal height measured	28 weeks	Corresponding
5	Fetal heart rate checked	140 bpm	Normal

F. CLASSIFICATION

- Case **was classified as:** *Normal pregnancy with mild anemia*

G. PRIMARY MANAGEMENT AND CARE

S. No.	Components of Care	Care Delivered by Student	Remarks
1	Assess maternal condition	Completed ANC assessment	Done
2	Provide IFA supplementation	Advised IFA tablets	Done
3	Monitor fetal well-being	Checked FHR	Normal
4	Nutrition counselling	Advised iron-rich diet	Done
5	Record findings	Documented in ANC register	Done

H. HEALTH ADVICE

S. No.	Advice Component	Advice Given	Remarks
1	Diet	Iron-rich foods advised	Accepted
2	Rest	Adequate rest advised	Understood
3	Danger signs	Explained bleeding, swelling	Important

I. REFERRAL DECISION

S. No.	Referral Criteria	Decision	Reason
1	High-risk pregnancy	Not Required	No complications

J–K LEARNING & CONCLUSION

- Learned antenatal assessment using SBA protocol
- Concluded importance of early detection of anemia

FILLED FORM 3: NCD CASE (HYPERTENSION SCREENING)

A–D BASIC DETAILS

- Student: Ankit Christian | Area: Community | Date: 23/03/2026
- Client: R.S. | Age: 52 yrs | Gender: Male
- Protocol: NCD (Hypertension)
- Complaint: Routine screening

Q E. SCREENING / ASSESSMENT

S. No.	Screening Component	Findings	Remarks
1	Blood pressure measured	150/96 mmHg	High
2	History of symptoms	Headache present	Relevant
3	Lifestyle assessment	High salt intake	Risk factor
4	BMI calculated	27 kg/m ²	Overweight
5	Family history checked	Positive history	Risk present

F. CLASSIFICATION

- Case was classified as: *Stage 1 Hypertension*

G. PRIMARY MANAGEMENT AND CARE

S. No.	Components of Care	Care Delivered by Student	Remarks
1	Measure BP correctly	BP recorded twice	Accurate
2	Identify risk factors	Assessed lifestyle	Done
3	Provide initial management	Advised lifestyle modification	Done
4	Educate patient	Explained hypertension risks	Done
5	Document findings	Recorded values	Done

H. HEALTH ADVICE

S. No.	Advice Component	Advice Given	Remarks
1	Diet	Low salt diet advised	Accepted
2	Exercise	Daily walking advised	Agreed
3	Avoid habits	Tobacco/alcohol restriction	Counseled

I. REFERRAL DECISION

S. No.	Referral Criteria	Decision	Reason
1	High BP reading	Required	Elevated BP needs evaluation

J–K LEARNING & CONCLUSION

- Learned BP screening and risk assessment
- Concluded importance of early NCD detection
