

REPORT ON OBSERVATION OF DISASTER MOCK DRILL

A. STUDENT DETAILS

- Name of the Student: Neha Patel
- Semester / Year: 7th semester /3rd Year B.Sc Nursing
- College Name: ABC College of Nursing
- Area of Posting (PHC/CHC/Hospital): CHC – Anand
- Location of Mock Drill: Community Health Centre, Anand
- Date of Observation: 26 / 03 / 2026
- Duration: 2 Hours
- Name of Supervisor: Mrs. S. Mehta

B. DETAILS OF MOCK DRILL

- Type of Disaster Simulated: Road Traffic Accident (Mass Casualty)
- Organizing Authority: District Health Department
- Departments/Agencies Involved: Health Team, Ambulance Services, Police Department, Fire Department
- Number of Personnel Involved: Approximately 50
- Setting: Hospital (Emergency Department)

C. OBJECTIVES OF MOCK DRILL

1. To assess preparedness of health team in managing mass casualty situations
2. To demonstrate triage and emergency care procedures
3. To improve coordination among different departments
4. To enhance rapid response and referral system

D. PRE-DRILL PREPARATION (OBSERVED)

- Briefing given by experts: Detailed instructions were given regarding disaster scenario and roles
- Allocation of roles and responsibilities: Each team was assigned specific duties (triage, treatment, transport)
- Equipment and logistics arranged: Stretchers, emergency kits, ambulances, triage tags
- Safety precautions ensured: Emergency exits were kept clear and safety protocols were explained

E. STEP-WISE DESCRIPTION OF MOCK DRILL

1. **Disaster Scenario Initiation:**
A simulated road traffic accident with multiple injured victims was announced.
2. **Alert and Communication System:**
Emergency alarm activated and information passed to all departments.
3. **Initial Response by Team:**
Emergency team reached the site immediately and started assessment.
4. **Rescue and Evacuation Process:**
Victims were shifted using stretchers to emergency area.

5. Triage and Patient Management:

Patients were categorized into red, yellow, and green based on severity.

6. Referral/Transportation System:

Critical patients were referred to higher center using ambulance.

7. Interdepartmental Coordination:

Good coordination observed between medical, nursing, and support staff.

F. ROLES AND RESPONSIBILITIES OF DIFFERENT TEAMS (OBSERVED)

- Health Team: Performed triage, provided first aid and emergency care
- Fire/Rescue Team: Assisted in safe evacuation of victims
- Police/Security: Controlled crowd and ensured safety
- Ambulance Services: Transported patients to referral centers
- Others: Support staff assisted in logistics and patient movement

G. OBSERVATIONAL ANALYSIS

- Communication effectiveness: Quick and clear communication among teams
- Team coordination: Well-coordinated and organized response
- Use of equipment: Proper use of triage tags and emergency kits
- Time management: Rapid response and timely evacuation
- Strengths: Efficient teamwork and preparedness
- Gaps/limitations: Minor delay in initial coordination

H. LEARNING EXPERIENCE

- Knowledge gained: Understood triage system and disaster management process
- Skills observed: Emergency response, teamwork, communication
- Importance of disaster preparedness: Essential for saving lives and reducing panic
- Relevance to nursing practice: Helps in handling real emergency situations effectively

I. CONCLUSION

The disaster mock drill was highly informative and provided practical exposure to emergency management. It highlighted the importance of teamwork, communication, and preparedness. Overall, the drill was effective in enhancing understanding of disaster response.
