

REPORT ON INTERACTION WITH HEALTH WORKERS

PART A: STUDENT DETAILS

- Name of the Student: _____
- Semester / Year: _____
- College Name: _____
- Area of Posting: PHC / CHC (Name): _____
- Village / Area: _____
- Date of Visit: ____ / ____ / ____
- Name of Supervisor: _____

DETAILS OF HEALTH WORKER INTERACTED

- Name of Health Worker: _____
- Designation: ASHA / AWW / MPHW (M/F) / HV
- Age: _____ Years
- Gender: _____
- Educational Qualification: _____
- Years of Experience: _____
- Area Covered (Population / Villages): _____

OBJECTIVES OF INTERACTION

1. To understand the roles and responsibilities of different health workers.
2. To explore their day-to-day activities in community settings.
3. To identify challenges faced during service delivery.
4. To assess coordination with other health team members.
5. To gain practical insights into implementation of national health programs.

STRUCTURED INTERACTION CONTENT

1. Roles and Responsibilities

- What are your major duties in the community?
- Describe your routine daily/weekly activities.
- What registers and records do you maintain?
- How do you prioritize your work?

2. Service Delivery Activities

- Maternal and Child Health services provided
- Immunization responsibilities
- Family planning services
- Nutrition services (especially for AWW)
- Disease surveillance and control activities
- Health education activities

3. National Health Programs Involvement

- Which programs are you involved in? (e.g., RMNCH+A, TB, NCD, etc.)
- Your role in implementation of these programs
- Reporting and documentation procedures

4. Community Interaction

- How do you communicate with community members?
- Strategies used for behavior change communication
- Community participation and support
- Handling resistance or misconceptions

5. Coordination and Teamwork

- Coordination with ANM, Medical Officer, Anganwadi Worker, ASHA
- Role in Village Health Sanitation and Nutrition Committee (VHSNC)
- Referral system followed

6. Challenges Faced

- Administrative challenges
- Community-related challenges
- Resource constraints
- Workload and time management issues

7. Problem-Solving and Coping Mechanisms

- How do you overcome challenges?
- Support received from supervisors
- Suggestions for improving services

8. Achievements and Satisfaction

- Major achievements in your work
- Job satisfaction level
- Motivational factors

9. Suggestions Given by Health Worker

- Recommendations for improving community health services
- Suggestions for students and future nurses

STUDENT OBSERVATION

- Observations about communication skills of health worker
- Professional behavior and attitude
- Community rapport
- Record maintenance and organization
- Strengths identified
- Areas needing improvement

LEARNING EXPERIENCE (REFLECTION)

- What did you learn from this interaction?
- How has it improved your understanding of community health nursing?
- Application of theoretical knowledge into practice
- Personal reflection on experience

CONCLUSION

- Summary of key findings
- Importance of health workers in community health system
- Overall impression

REPORT ON INTERACTION WITH HEALTH WORKER

A. STUDENT DETAILS:

- Name of the Student: Ankit Christian
- Class / Year: M.Sc Nursing 1st Year
- College Name: ABC College of Nursing
- Area of Posting: PHC – Petlad
- Village / Area: Bandhani
- Date of Interaction: 28 / 03 / 2026
- Name of Supervisor: Mrs. R. Patel

B. DETAILS OF HEALTH WORKER INTERACTED

- Name of Health Worker: Suresh Kumar
- Designation: MPHW (Male)
- Age: 42 Years
- Gender: Male
- Educational Qualification: Diploma in Multipurpose Health Worker
- Years of Experience: 15 Years
- Area Covered (Population / Villages): Bandhani and nearby villages (Population approx. 3500)

C. OBJECTIVES OF INTERACTION

1. To understand the roles and responsibilities of MPHW in community health
2. To study various services provided at the field level
3. To learn about involvement in national health programs
4. To identify challenges faced during service delivery
5. To understand coordination with other health team members

D. STRUCTURED INTERACTION CONTENT

1. Roles and Responsibilities

- Conducts household surveys and maintains demographic data
- Provides basic treatment for minor ailments
- Supports disease prevention and control activities

- Supervises sanitation and environmental hygiene
- Assists in implementation of national health programs

2. Service Delivery Activities

- Conducts immunization sessions with ANM
- Provides treatment for common illnesses like fever, diarrhea
- Participates in vector control activities (anti-larval measures)
- Conducts health education on hygiene and sanitation
- Supports screening for hypertension and diabetes

3. National Health Programs Involvement

- Involved in National Vector Borne Disease Control Programme
- Supports TB program by identifying and referring suspected cases
- Participates in National Programme for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases and Stroke (NPCDCS)
- Helps in COVID-19 awareness and vaccination drives

4. Community Interaction

- Communicates using local language for better understanding
- Conducts door-to-door visits and awareness campaigns
- Motivates people for sanitation and safe drinking water
- Builds rapport through regular contact and trust

5. Coordination and Teamwork

- Works closely with ASHA, ANM, and Anganwadi Worker
- Reports to Health Visitor and Medical Officer
- Attends regular staff meetings at PHC
- Refers patients to higher health facilities when required

6. Challenges Faced

- Lack of awareness among rural population
- Resistance to behavior change (e.g., sanitation practices)
- Shortage of supplies and manpower
- Large area coverage leading to workload issues

7. Problem-Solving and Coping Mechanisms

- Conducts repeated health education sessions
- Takes support from local leaders and community groups
- Coordinates with health team members for support
- Uses practical demonstrations to improve understanding

8. Achievements and Satisfaction

- Improved sanitation practices in village

- Increased awareness about vector-borne diseases
- Successful participation in health campaigns
- Feels satisfied serving the community

9. Suggestions Given by Health Worker

- Increase manpower in rural areas
- Provide more training and refresher courses
- Improve supply of medicines and equipment
- Strengthen community awareness programs

E. STUDENT OBSERVATION:

- Communication skills: Effective and understandable
- Professional behavior and attitude: Dedicated and responsible
- Community rapport: Good relationship with villagers
- Record maintenance and organization: Properly maintained
- Strengths identified: Strong field knowledge and commitment
- Areas needing improvement: Needs more logistical support

F. LEARNING EXPERIENCE (REFLECTION)

- Learned about the important role of MPHW in disease prevention
- Understood practical challenges faced in rural health settings
- Gained insight into implementation of national health programs
- Realized importance of teamwork in healthcare delivery
- Developed interest in community-based health services

G. CONCLUSION

The interaction with the MPHW provided valuable practical knowledge about community health services. It highlighted the importance of field-level workers in disease prevention and health promotion. The experience enhanced my understanding of real-life application of community health nursing concepts.
